

# space\_ADV

500 - 800 - 1100

: external filter  
for aquariums

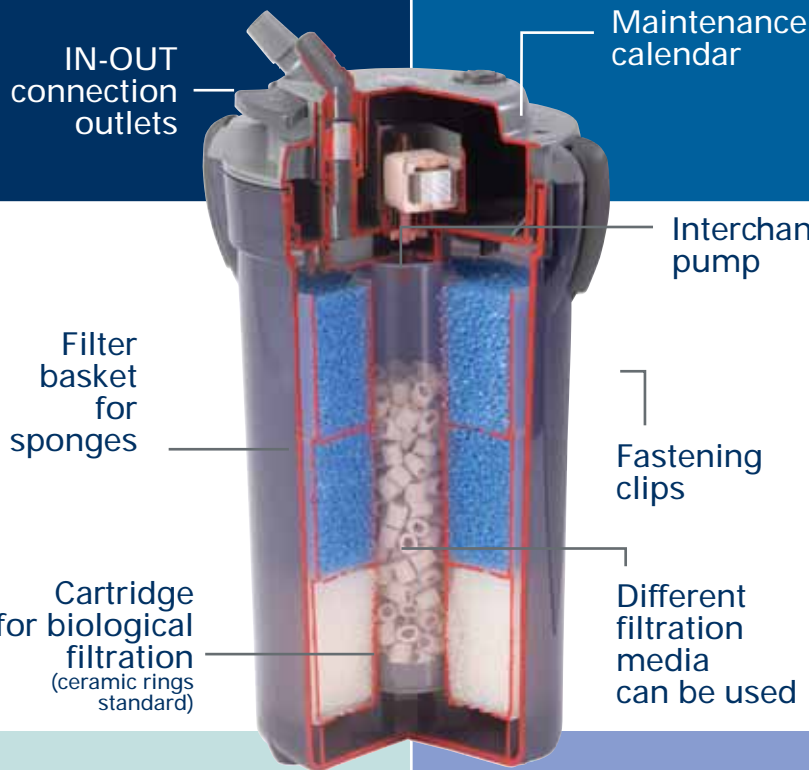

space\_adv > filtro esterno per acquari

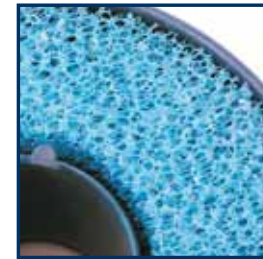

**ENG** Space ADV is the new line of external filters proposed by SICCE. Provided in 3 models 500/800/1100 and studied to guarantee an efficient filtration system, favoured by the dimensions and the space dedicated to filtration. The filters are supplied with sponges of different density and typology for the mechanical filtration, as well as the media/material for biological filtration. An innovative compartment inside the filter protects the bacterial flora during the cleaning operations in order to maintain an unaltered equilibrium. Space ADV further distinguishes itself for the extreme silence and immediate priming system of the filter.

**I** Space ADV è la nuova linea di filtri esterni proposta da SICCE. Previsti in 3 modelli 500/800/1100 studiati per garantire un efficiente sistema di filtraggio, favorito dalle dimensioni e dallo spazio dedicato alla filtrazione. Sono dotati di Spugne di diversa densità e tipologia per la filtrazione meccanica, materiale filtrante per la filtrazione biologica. Un innovativo vano all'interno del filtro protegge la flora batterica durante le operazioni di pulizia per mantenere inalterato l'equilibrio. Space ADV si distingue inoltre per la silenziosità e per l'immediato sistema di innesco del filtro.

**BACTERIAL PROTECTIVE SYSTEM**

**EASY ACCESS TO MECHANICAL FILTRATION**

**CARBONATED SPONGE (optional)**

**MAINTENANCE CALENDAR**
